

My New Invention

Part A: Write a brief description about the robot. Write about 80 words.

Description

- (1) Today, I have designed a robot to help make more our life easier. His name is Ben, a Home Help robot. Let me introduce his appearance to you first. He has a big head with an antenna. The antenna can help you call your friends when you are busy. There are three big eyes and a big month on his face but he does not have neck.
- (2) His body is like a rectangle with two arms. He can do many things. There is a big smile on his face. On his body, there is a power button. When you turn it on, Ben can start to work and move. In the middle of his body, there is a big TV.
- (3) The antenna on his head can help you call you friends anytime. There is a power button on its body. You can say "Hi Ben" when you need his help or when you are bored, you can talk with him. Ben's arms are very useful. He can sweep the floor, cook, do shopping etc. On its body, there is a TV, you can watch TV anytime.
- (4) Ben is surely the most helpful robot in the world, your life would be more comfortable with the help of Ben.

Part B: Follow these steps to operate the robot. Write about 80 words.

1. Check the package contents, such as: Memory card power cable, remote control.
2. Use the power cable to charge the robot for 10 hours.
3. Insert the memory card into the card slot when you have charged the robot completely.
4. Turn on the power button
5. Use the remote control to operate the robot and try to talk with him.
6. Finish the set-up of the robot, you can start to use it.
