

An Information Poster

Environmental Day

Friday, 14th October, 2018

We want your suggestions for following:

Environmental issues to focus on

Hong Kong is probably the world's worst city for light pollution. The levels of light pollution are very high in areas like Tsim Sha Tsui, Mong Kok and Causeway Bay. Since Hong Kong's commercial and residential districts are not strictly separated, light pollution affects resident's health. Those living in the most affected areas have trouble in sleeping. Being exposed to light at night has been shown to be linked to depression, sleeping disorders and other health problems.

Air pollution is also considered a serious problem in Hong Kong. For about one-third of the year, visibility is less than eight kilometers. The air pollution levels in Hong Kong are extremely high and the bad air affects our lungs, blood vessels and hearts. The bad air not only harms our health, but also scares investors away and lowers Hong Kong's ability to attract skilled foreign workers.

Theme, slogan and activities

I create a slogan to represent the theme of "Environmental Issues". The slogan is as follows: "Keep pollution away, Be a healthy city today!" I believe that this slogan is simple and easy to remember, Hope all of the people would keep this slogan in mind and follow the ways to keep pollution away.

How to publicise the even

I suggest we should start educating children at a young age and create more green spaces within buildings. Also, we should take part in international events such as Earth Day and World Water Day and volunteer at local community centres and promote green lifestyles.
